

TRUCK1CALL

Business Management Services for the Trucking & Logistics Industry

INTRODUCING POWERFUL TRUCKING SYSTEMS

★ INNOVATION / LOW COST ★ TIME SAVING ★ WIRELESS TRANSITION ★ PAPERLESS OPERATION

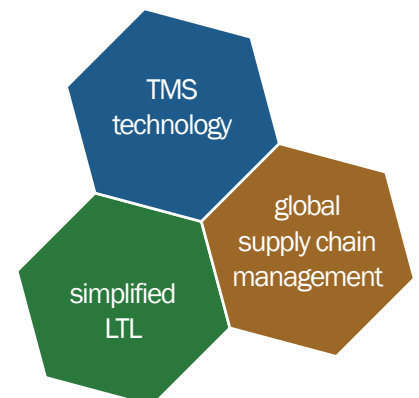

We analyse, design and deliver proven innovative trucking solutions for **freight brokers** and **independent truckers**

Truck1Call is part of an International Group of companies operating large service fleets in the Utilities, O&G and Pipelines industries.

Our Group includes its own High Tech R&D company with numerous Logistics systems, technologies and processes that enhance productivity and cost management of field operations, using advanced proprietary CRM systems, GPS and wireless technologies.

Our systems processes and technologies are fully tested, validated and implemented in high sensitivity and critical operations including Emergency Response, Public Safety and Defense applications through our own operations and have created and supported continuous exponential business growth.

Truck 1 Call system includes

Truck 1 Call benefits to the Freight Brokers

Truck 1 Call benefits to Independent Truckers

Truck 1 Call and Technology

- **Electronic Load Board**
 - **One Call Logistics Management Centre** with full scale dispatching
 - **Electronic Business Management** system (Truckbase ERP)
 - Location Based Load Allocation
 - GPS Tracking, Fleet Management & Maintenance systems
 - RFID systems
 - In-Truck Entertainment and Advertisement system
 - Add on services (Factoring, Accounting, Insurance, Financing, Road Assistance, truck Maintenance and repairs, Wholesale Fuel)
-
- A low cost Electronic Board – available on a pay per load service and/or with low cost membership.
 - Membership includes Android phones and Android Apps to make the shipment monitoring seamless and dramatically reduces phone calls .
 - Reduces time for load allocation as result of the availability of a massive independent truckers community.
 - Seamless monitoring of the load (truck) via GPS and a fully integrated ERP system, eliminating multiple calls and time consuming interactions between truckers and dispatchers.
 - Seamless monitoring of Container Goods' conditions via active and passive RFID combination systems.
 - Increased safety and security against goods tampering.
 - Reduced administration costs due to increased efficiencies and the electronic administration of billing and payroll services by the ERP system.
-
- Full scale Electronic Business Management Services using a Cyber One Call Centre.
 - LTL services and load optimization services reducing downtime between loads.
 - Direct Marketing services for destination routes with shipping companies.
 - Improved road safety through elimination of multiple calls by shippers and brokers.
 - Complete suite of Business Management Services, Administration, Billing, Receivable collection, and Payroll services.
 - State of the Art Technology puts Independent Operators on same playing field as the major trucking companies.
 - Lowering operational costs and making the trucking industry more competitive with the rest of the logistics community.

Truck1Call is a full scale provider of all Logistics technologies as part of a business partnership / membership program which includes:

- Full access to "TruckBase" Electronic Business Management system
- Full access to "SpaceCompass" Fleet Management and Maintenance system
- "Hermes" GPS platform for vehicles
- Android Apps for Truckers and Brokers
- Full scale Electronic Board with state of the art marketing tools for fast load allocation and price negotiations
